Research Internship BEIFI IPN (August – December 2020)

IPN CECYT #9 JUAN DE DIOS BÁTIZ

*Miguel Hidalgo, Mexico City
High School Diploma (Jul 2017)*

Skills

Tools & Technologies

3 Years: C, HTML, CSS, Java, MySQL, PHP

1 Year: Python, JS, React

6 Months: Assembler, VHDL
Object-Oriented Programming

Linux

Version Control (Git)

Basic Knowledge:

Processor architecture, Embedded
Systems, Machine Learning, SoC, Bash

Languages

Advanced English

Spanish (Native tongue)

Other Skills

Microsoft Office

Blender

Projects

Heartlight Store | February 2021

Built a responsive web app using Node.js and React that allowed for different categories of products to be offered. Technologies like Express, React Router and JWT were used.

PoliTaquilla | June 2019

Built a web app using PHP and JS that allowed events to be managed as well as book tickets. Technologies like jQuery were used.

WebQuest Android App | May 2017

Android Java application made to manage small forums. Using the database of an already made web application. A web service was made in PHP to attend the android app. Technologies like JWT were used.

Mechanical Workshop Scheduler | June 2016

Web application made to manage appointments for a mechanical workshop. With the goal of monitoring the process of washing using the app. Made fully in PHP, HTML, and CSS, using MySQL as DB manager.
